The concrete choice for quality and service since 1962.

Mid-Size Landscape Blocks

Creating Curved Walls

The Mid-size Landscape Block steps back one inch on every course allowing it to lean back into the earth it is retaining. And with tapered sides, this block can create curved walls with a radius as tight as 6 feet to the back of the block.

Mid-Size Landscape

If you are looking for a landscape block that is large enough for the most demanding job, yet small enough to be handled with light-duty equipment, the Mid-size Landscape Block is perfect for you.

Residential Settings

The Mid-size Landscape Block looks beautiful in a residential setting. Where larger blocks tend to overwhelm, the Mid-size looks right at home. Each block weighs only 560 pounds. That's light enough to be handled by a skid-steer.

Key Offerings

Make It Picture Perfect with Color

Ask us about color options for your project. We can make any Chromix color and can color match most major concrete pigment manufacturers.

Focus on What We Do Best: Serving our customers in the local area.
